A vertical timeline diagram on the left side of the page shows the sequence of commits. It features a vertical orange line with white circles representing commit points. A blue line branches off from the orange line, moves up and to the right, then loops back down and to the left to merge into the orange line. This visualizes the sequence of commits: initial commit, create starter code, update of angular/cli, merge branch 'release/0.0.1', and merge tag '0.0.1' into develop.
